2. LEANDER: "Ha, another move nearer the goal. By ginger when I feel that my marriage day is as good as settled I can hardly retain myself."
THE OTHER APPLICANT: "WEGOW! He's jabbed me!"
LULU: "Oh, Leander, just see what you have done!"

3. LEANDER: "Oh, my dear sir, I most humbly beg your pardon. In my joy and enthusiasm over my approaching marriage I forgot myself. Pray forgive me."

THE OTHER APPLICANT: "Well, I'll let it go this time. I can't blame you for being happy. I'm going to get married myself."

LULL: "Oh, isn't he a kind and forgiving man?"

4 LEANDER: "Hoop la! I'm next! I'm next! I get my marriage license today. No bad luck can prevent it."
THE OTHER APPLICANT: "There he goes again, and on my other cheek! Ye gods! This is too much!"
LULL: "Leander! LEANDER! See what you are doing to that poor man."

6. THE OTHER APPLICANT: "And I wanted to get married to-night. I pity that poor girl. It's a shame for her to tie herself up to such a sap-headed chump!"
LULU: "Did you hear what that poor man said? Well, I'm commencing to think the same thing myself."
LEANDER: "Ye gods! I'll eat a pound of dynamite and jump off a roof!"

ADOLPHI (From Hamburg)

JIMMY—HE STOPS THE WATER

HAPPY DAYS ON BOARD DER PROSIT!

BIGGEST BASEBALL OUTFIT

FREE BIG BASEBALL CLUB OUTFIT

(Extra Regulation Ball Present.) This big outfit, consisting of pants with waist strap, divided buttons, heavy elastic leg bands, and specially padded around the hips for ease sliding. The shirt has combination sleeves, here fronts, metal epaulettes, indestructible lace attached, and is very full around the shoulders, giving free action. A Belt and Regulation Cap go with each outfit, and each article is made of material specially selected for rough usage. These outfits were made especially for us under personal supervision of an expert, and we guarantee each article to be of good material and correct baseball attire. We claim this to be the best outfit, and we want you to read the description carefully. We also give you the description of the outfit. MARK, REGULATION HANDBALL, PAIR PINK OVEN GLOVES, CATCHER'S MITT, for selling 32 handkerchiefs at 30c each.

CHARGES PAID BY US. DELIVERED WITHOUT EXPENSE TO YOU.

JUST LIKE THIS PICTURE

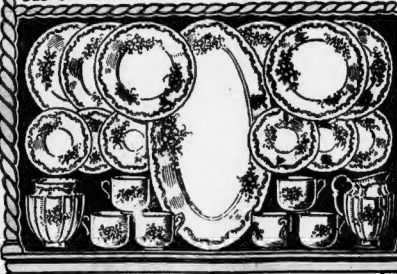

The wearer some piece of jewelry will be the envy of all her friends and for owning a WATCH. This watch, locket and pin, 14K, GOLD plate, is all the fashion and is beautiful. Do not lose it with the cheap jewelry one finds in the market. Discounted one year. Offers for selling 32 handkerchiefs at only 10c each.

Genuine Diamond Ring.

Mine's or Lady's size. The diamond ring we send is just like cut, set and an imitation, but a GENUINE DIAMOND in latest setting with ornamental "feet". The diamond made out free and clear and sparkles from every side. If you select this diamond ring and a strip of paper that just fits around your finger. Offers for selling 32 handkerchiefs at 30c each.

FREE TO ANY BOY GIRL OR WOMAN

HANDSOMELY DECORATED IN COLORED WILD ROSE DESIGN COMBINATION DINNER & TEA SET

The above Superbly Decorated China Free to Women.

This is a housewife's opportunity, and nothing will delight her more than this lovely set of china that may be used as Dinner or Tea Set, as a large ornamental dinner platter is included. Each piece is elaborately decorated in colors in a beautiful wild rose design, and it will ornament the most bounteous table. This magnificent premium is given for selling only 32 of our extra large, high-grade Handkerchiefs, at 10 cents each.

The China set we send you is exactly as described above.

NOT ONE CENT OF YOUR MONEY REQUIRED

BOYS' WATCH, ALSO SOLID STEEL CHAIN. Fine American dust and damp proof movement. Accurate timekeeper. An elegant pickled chain with each watch. Keeps time equal to a \$20 timepiece, is fine enough for exposure to wear and will stand hard wear. These watches are guaranteed for one year. Offers for selling 32 handkerchiefs.

Snapshot Camera & Outfit.

This outfit produces a perfect picture finished in all details. Can be operated by any inexperienced person and contains high class fittings. A full developing and printing outfit with book of instructions goes with each camera. With this outfit you can save money and perfect yourself in the art of photography. Free for selling 32 Handkerchiefs at 10 cents each.

RUFFLED SILK PARASOLS

TORQUOISE ORAMETHYST GRADUATE BEAD NECKLACE

PARASOL, SILK FREE

(Extra Hand Necktie Present.) Girls, this is the prettiest, dearest and most serviceable Parasol that we have ever given away. It is a new design, made especially for us. Read the description carefully. The top is covered with the guaranteed Real Silk Ribbons, and the edge is finished with a large 3-inch Silk Ribbon, scalloped and pinked. Each is fitted with a long natural wood stick, with a white ivory handle. Attached on the white when opened - large enough for any body. A dress and a silk ribbon, and a color that van as easily. Lorraine, may White or Blue, and a lot, just free of all charges to you for selling 32 handkerchiefs at 10c each. We will also give you a pair of extra premium of 32 handkerchiefs at 10c each. ANDREW'S GRADUATE BEAD NECKLACE.

FREE HOW TO GET THESE AND OTHER DESIRABLE ARTICLES FREE

SEND NO MONEY - We Trust You. Just write us for thirty-two of our EXTRA LARGE high-grade, Hemstitched Handkerchiefs, which we deliver free, without advance payment or deposit. Sell them for us at only 10 cents each and we will ship you, free of all expenses, costly and desirable premiums or your choice from our list of Magic Lanterns, Books, Razors, Rifles, Silk Shawls, Hand Bags, Sewing Boxes, Printing Press, Lace Curtains, etc., which we will send you. We take back what is unsold and reward you just the same. All premiums exactly as represented and delivered promptly. **WE GUARANTEE SATISFACTION.** Don't waste time trying to sell undesirable trinkets. Handkerchiefs are a necessity. Everybody buys them. Our Handkerchiefs are high grade and sell quickly. It is easy to get a premium by selling our goods. Try it. Write at once, giving full name and address, also freight and express office.

WOOD-WOOD CO. DEPT. 22, No. 2 BROADWAY, N. Y.

Notable Portraits of Society Leaders— No. 7.

MRS. SPENDER
CLAY.
(PAULINE ASTOR)

FROM THE PAINTING
BY MISS TINI RUPPRECHT
COPYRIGHT 1906 BY THE
AMERICAN JOURNAL
EXAMINER.

WHEN Tini Rupprecht, the fashionable new painter of women, started to sketch the daughter of William Waldorf Astor she strove to catch and perpetuate by the subtle delicacy of pastel the wistful look of sadness that ever flicks in her deep dark eyes. This expression of pensive sadness—almost weariness—is haunting after a little acquaintance, and its secret has puzzled many an artist to find and society always. Some have ascribed it to the long-repressed child-life she lived alone with her gloomy father in the child's "old castle." Others have ascribed it to the loss of her only sister, the little Gwendolyn, who died in early childhood, and her mother, the beautiful Mary Fiske of Philadelphia, who died after a long retirement from the world of melancholia. Others have ascribed the riddle in its habits—for she has never been known to smile, and this, indeed, have ascribed it to the secret sorrow of a past romance. No one, however, has seen the look of wistful yearning in her eyes, which are really beautiful and the reason why they are purple-black.

From the viewpoint of society it seems incomprehensible that one so young, perhaps the greatest American-born heiress of to-day, and with the hoards of the Astor riches at her command, should be blasé with life. She is an enigma to Mayfair. The eyes of London are all upon her now. Since she, as Pauline Astor, became two years ago the wife of Captain H. Spender Clay at St. Margaret's in Westminster amid splendor like the pomp of kings, very little has been seen of her in the great world where one amuses oneself. But now that summering in southern climes has restored her health and the sanctities of the nursery are over, it is the wish of both her husband and her father that she should leave the rural quiet of Surrey and Ford Manor and take an exalted place about the Court of St. James as becomes her state—and heiress to \$25,000,000. As a beginning to this end a town house has been taken in Berkeley Square, and Mrs. Clay will be launched on her career as a fashionable leader of society in England with \$1,000,000 a year to spend in luxurious amusements.

THE LATEST AND GREATEST TRIUMPH OF THE GIBSON GIRL

How Mrs. John Jacob Astor Made the Match; How Mrs. Nannie Shaw Americanized Young Astor and How "Mrs. Jack" and "Mrs. Will Dominated the '400."

WITH the pack in full cry and a strong breeze underneath her, to see Nannie Langhorne riding to hounds was a sight for the gods. In the old days of her girlhood, at the Deep Run in Virginia, she was Diana atroped, and it is no stretching of facts when one avows that men came from far and fast to see "Cotton Chawers" gallop with her pink cheeks aglow and her fair hair unbound to the breeze round the mud in her mud-scap abandon for the brush. Nothing faunted this young Virginia equestrian in the way of ditch or fence or bill or hollow, and at sixteen she was famed as the most intelligent and brilliant horsewoman to her native State.

"Holding over with spirits," "full of the old Nick," "dashing," "charming," "original," "stunning," these were the ever-recurring apt expressions one always heard when Miss Nannie was being charmed. And long before the pregnancy herself got to be known beyond the borders of the Old Dominion, she had puzzled, surprised and pleased many a young fellow of the F. F. V. "Somehow you don't just know how to take Nannie Langhorne," was a frequent declaration. "It's hard to understand her." But it's not to affirm in the light of events since then that Nannie Langhorne understood herself. She wasn't "a Gibson girl" for nothing.

And it is entirely due to this complete mastery and understanding of herself, as of her horse, that she has captured what in many ways may be considered the most desirable branch in the great hunting field of the socially ambitious—the Astor and the Langhorne.

Little Miss Langhorne, in the first blush of her debutante days, was frank. Her oldest sister had married well enough, and become Mrs. T. Monroe Perkins. But her life was doomed to be passed in the dingy, shabby, steep mere existence of Richmond. The next offer after that had been engaged and got married, and was lifted up to a much more brilliant plane. She was the wife of a mighty clever young artist, "Charles Lann Gibson, who was making \$50,000 a year, with New York to spend it."

"I must do even better than Irene," she said. "I must have money, and lots of it, money is power. I want to do like Irene, to make myself felt. And I don't want to marry a man unless he has hundreds of millions."

Miss Nannie's Dazzling Ambition. The longer and thicker of Nannie Langhorne is to be satisfied now to the full, for in becoming Mrs. Waldorf Astor she will have the advantage of the Astor millions to draw upon, and at the birth of William Waldorf Astor Jr. she will up and be rich and receive a net income of \$200,000,000. In the wildest dream of her ambitious girlhood little Nannie Langhorne had never dreamed so dazzling a day dream as that.

Two things went for Mrs. Langhorne Shaw the late of William Waldorf Astor—three two—the beauty of her being on horseback and her holding irrefragable Americanism. It is now an open secret that it was Mrs. Jack Astor for the two women are the thickest of couples who got a sea into the ear of her young cousin across the water. For years the two branches of the Astor family—the John Jacob Astor, and the Waldorf Astor—have had blood between them, but when young Waldorf happened to meet his cousin Jack's wife at the house of a common friend, young Waldorf was completely overthrown by her loveliness. The Willy Manmaker, Mrs. Jack.

The young man couldn't see why so old row way back years ago should interfere with the happiness of knowing such a charming goddess, and towards congratulated cousin Jack on his lifelong good luck. He asked to be allowed to call. The call developed into quite a pleasant intimacy, and shortly into a fully good friendship.

Now it was at just this time when young Waldorf was getting introduced to his Yankee cousin that she asked the young man if he would take her to the hunt at Market Harborough. She had promised a young American friend of hers to visit, a Southern beauty, Mrs. Langhorne Shaw, to be there, for she was to ride with the pack. Young Astor was only too pleased, and he was to do just that.

And it was there at Market Harborough—just as Mrs. John Jacob Astor was in her glory, caught his pearls just as Bobbie Shaw, her divorced husband, had away back several years ago in Old Virginia. And suddenly dropping into young Astor's eye all reason, he saw the light of her face, the beautiful, dear Nannie. Mrs. Astor presented Mr. Astor and left the rest to fate and to Nannie.

If young Astor was beguiled by Mrs. Jack he was completely fascinated by Mrs. Nannie. The States her transatlantic cousin had quite succeeded. And it was not strange that the young Astor, always breathing in the crowded air of his father's house, his son, Miss Langhorne and grandson by nature, had not much opportunity for young girls and women, and almost never for American girls. And when Mrs. Nannie came to see and hear, she was a revelation. Her utter unconventionality and intense enthusiasm in the broad-and-butter, stiff and formal dress of the English. For seven months he would see her, and at the end of that time he was

three-fourths American and four-fourths in love. Glorious, he followed her across the Atlantic.

It is only fair to young Astor to say that he has never been so aggressively British as his father, who spurns almost everything American, or his younger brother, John Jacob, who is an out-and-out Englishman. In rebuke to the taunt that he was a man without a country, he referred to the fact that he was a co-repatriate in the American estate of his father, and that he had never renounced his citizenship, as the latter had done.

Making Him Over Into an American.

Utterances like these from his lips showed that the soil was really where Mrs. Nannie took advantage of his willing to make him all over an American.

"If I were by some unfortunate to be made penniless I should complete some special line in law that have a great fascination for me, and I would try to be a success. I am living my life the same as any other young man must do who cares for the respect of the world."

"I work harder than most chaps who have to work for their living, because I have to do many duties that the average man does not. If a man is on the level, no matter whether he is poor or rich, he is entitled to respect, and generally he gets it."

And so, having almost completed the Americanization of young Astor, she agreed to surprise her engagement the other day.

Being a divorcee it was to be expected that Mr. Astor pored gloomed over the silence and the fact that she was an American irritated him still further. But Pauline disappointed him in not marrying a title, and so, it turns out, has young Waldorf, in making with a commoner. She just leave it to Mrs. Shaw's wit to win over the father, as she has the son, say her admirer.

Although George Alexander instantly overlooked her divorce and received her at the palace, Astor's wife will have a serious time of it getting married, either in church in England or in any house, for that matter, and even in securing any minister, any kind to tie the knot—but Mrs. Shaw is never to be there.

If she does not get what she wants she is ready to gather up the bedspread in her impetuous dander and jump over the fence. And it is more than likely she may induce young Astor to live here always, anyway. Some of her friends would be surprised if she did, and with Mrs. John Jacob Astor rule society here just as the two women, Mrs. Jack and Mrs. Nannie, were twenty-four years ago.

The first chapter in the amazing romance of Nannie Langhorne and her first husband plans her to unfold here back to 1897.

In accordance with the Langhorne precedent, Miss Nannie, after Mrs. Shaw became Mrs. Langhorne, stepped into the empty slippers and became Miss Langhorne. Having the greatest of being openly called one of the "Gibson girls," and being splendidly tall, exceedingly light, with a kick up to the throat and a long, willowy neck, perfectly A. in Gibson, southern swains swarmed to see and hear her. Nannie Langhorne knew her points, and thoroughly understood the asset of being as original as the most modern girl. She looked with greatest favor on Robert Gould Shaw No. 2, of Boston.

Miss Langhorne explained it on the ground that it was their community of interest in horseflesh. He was such a crack polo player and a rider of the best, and she was willing to break their backs if the lady had them. But then, who else would direct happen to have millions too. Bobby Shaw had had. And it was Robert Gould Shaw who led the third Miss Langhorne to the altar.

Life started off very nicely with them. They had

William Waldorf Astor, Jr., from a Snapshot Photograph Taken During His Recent Visit to New York.

nothing to do but to spend money, and they went it with all the nonchalance of youth, over the world they went in the craziest the most fashionable, the most extensive gallop. They were in Boston and the Orient, in Paris and on the Riviera, in London and on the Nile, everywhere living the life of the stars of the stage. The most gorgeous jewels, the most perfect dress, the finest of her, the choice of all society, were hers, and always heretics and heretics of money.

No Fight Too High for the Gibson Girl.

But they didn't bit it off at all, and the end after half a dozen years was a divorce. People who didn't like Nannie Langhorne, and Mrs. Langhorne Shaw who married her to be called—and had felt its most serious blow to her—her bookkeeping house from one bobble to catch another bobble, for while Bobbie E. Shaw had the \$100,000,000, Bobbie W. had the \$200,000,000. And a long time the New Yorker hovered about this line of Old Virginia.

First she would and then she wouldn't, and when people wondered why the fair Nannie Shaw waiting for? asked her self. Nannie for once in her life didn't know herself. And not one of the various "Gibson" New York London or Boston or Virginia had the satisfaction of crying out, "Ah, I told you so," for no one knew anything about the matter in any of the smart sets in which she is intimate.

It must have looked very funny for the spectators to come then with this valuable show. She is the cleverest thing that Miss Nannie Shaw is in her whole electric career.

Mrs. Nannie Langhorne-Shaw, from Her Latest Photograph.

STRANGER THAN FICTION

Copyrighted, 1906,
by the American Journal-Examiner.

STRANGER, indeed, than the most daring guess of fiction has been the record of photographic achievement in the past few weeks.

From observing a distant planet the camera has turned its eye to the microscope and caught snap shots of microbian activities. It has peered into the human stomach, and is said even to have photographed the unspoken thoughts of the brain.

Professor Lowell has succeeded in showing clearly on a negative the canals of Mars, though many keen-eyed astronomers have never been able to see them at all.

Professor Ernst, of Harvard, using ultra-violet

light, has been the first man to photograph successfully living germs. Hitherto all germ photographs were of dead, shriveled and artificially colored remains, of little value except for identification.

Even the dark interior of the stomach has not escaped the camera's eye. Dr. Turck, of Chicago, with a little electric light on the end of a tube containing a system of lenses, has made it possible to photograph the walls of the living human stomach.

Most extraordinary of all the claims made by photographers is that thought itself can be caught on the sensitive plate and recognized. From Colorado, New York, London and Paris come announcements that attempts to make thought pictures appear have met with repeated success.

1- Photographers Apparently Succeed in Actually Taking Photographs of the Unspoken Thoughts in Your Mind.

THE latest and most astonishing claim ever made for photography is that the thoughts in a person's brain can be photographed on a sensitive plate so clearly that a stranger can read them at a glance. Two Americans, a French and an English photographer make this claim.

They exhibit as proof a series of weird images. These are really sort of grotesque likenesses to objects of which the photographer was thinking. Sometimes the likenesses make the likeness unrecognizable. This the experimenters believe is the fault of their own methods of thinking.

In other words, they say that we do not remember things as they really are, but carry in our minds an exaggerated picture composed of an object's main features, barren of detail, and all out of proportion.

A carefully trained observer has some complete mental pictures, and they are in better proportion than those of the average man.

The latest of thought photography is that every thought is accompanied by a disarrangement of certain rays which pass off through the skull. There are thoughts of hearing, smelling, tasting and feeling, of heat and cold, anger and love and many others, none of which can be recognized, as they have no definite shape.

Only when the thought is of some object even does it become definite in shape and cover the skull in the form of an image. Apparently this image travels out through the air just as the picture from a magic lantern is projected.

As the rays are not visible to the eye, the thought image can only be caught upon a highly sensitive plate.

The thought pictures seem to come from the center of sight in the rear of the head, but they appear to radiate from the forehead as often as any other place.

Mr. N. Cutting, of Colorado Springs, claims to have

impressed the features of his father's face on a plate.

Mr. Cutting remembers his father only by a picture. He had read of the experiments in this line conducted by Major Jargens in Paris, and determined to make an attempt himself. Accompanied by a witness, he descended into his cellar, and there in the darkness found an unexposed plate in front of his forehead.

For thirty minutes he concentrated his mind as much as possible on his father's picture. After half an hour the strain became unbearable and he postponed developing the plate. The outlines of a face soon appeared, and when at last he took it into the daylight it was seen that the features resembled quite strikingly those in the picture of his father.

The Ghost of the Flatiron.

Later experiments proved fairly successful. A horse with legs and head a little too heavy for his body appeared snoring off from the upper corner of a plate. An attempt to reproduce the Flatiron Building in New York resulted in a tall, thin, wary apparition. Mr. Cutting calls it the "ghost of the Flatiron."

Mr. Cutting expects next to experiment with animals. He believes that these thoughts can be caught also. His plan is to tie a plate over the forehead of a hungry dog and then to exhibit a bone or piece of meat illuminated by red light. How to keep the dog from breaking the plate is one of the chief difficulties attending this novel experiment on canine thought.

Under Mr. Cutting's supervision C. H. Myers, Street Commissioner of Colorado Springs, succeeded in obtaining a photograph of his right arm. Mr. Myers had this number ten years ago. Whether the picture is a so-called "natural" one or a thought photograph is not known.

The late Mr. J. T. Taylor, former editor of the British Journal of Photography, made several most interesting tests before his death, one of Mr. Taylor's last works was a paper on the subject which was published after his death. Mr. Taylor was the phenomena of psychic photography, and he discovered the word spirit, believing that spirits have nothing to do with the subject.

"For several years," said Mr. Taylor, "I have entertained a strong desire to ascertain by scientific investigation the amount of actual truth in the corresponding allegation that figures other than those actually present in the room appeared on the sensitive plate."

Mr. D. of Glasgow, in whose presence psychic photographs have been alleged to have been obtained, was lately in London on a visit, and a mutual friend got him to consent to extend his stay in order that I might try to get a psychic photograph under the best conditions. To this he willingly agreed.

Mr. D.'s outlines were exceedingly simple, were

contemptuously expressed to the best, and entirely uncolored in. They were that I for the moment would assume them all to be tricksters, and to guard against fraud should use my own camera and unopened packages of dry plates purchased from dealers of repute, and that I should be excused from allowing a plate to go out of my own hand till after development unless I felt otherwise disposed.

"As I was, to treat them as under suspicion, as must they treat me, and every act I performed must be in the presence of two witnesses; nay, I would set a watch upon my own camera in the case of a duplicate one of the same form—in other words, I would use a binocular stereoscopic camera and dictate all the conditions of operation."

"Mr. D. was the first sitter, and for a reason known to myself I used a monocular camera. I myself took the plate out of a packet just previously ripped up under the surveillance of my two detectives. I placed the plate in my pocket, and exposed it by means of a camera which I held in my own hand, keeping one eye, as it were, on the sitter, and the other on the camera. There was no background. I myself took the plate from the dark slide, and, under the eyes of two detectives, placed it in the developing dish. Between the camera and the sitter a female figure was developed, rather in a more pronounced form than that of the sitter."

Many experiments of this nature followed, on some plates were abnormal appearances, on others none. All this time Mr. D., the medium, during the exposure of the plates was quite inactive.

"The psychic figures behaved badly. Some were in focus, others were not. Some were lighted from the right, while the sitter was from the left, some were comely, others were not so. Some uncolored the major portion of the plate, quite obliterating the material sitter. Others were as if an extremely badly vignettized portrait were held up behind the sitter."

"But here is the point: Not one of these figures which came out so strongly in the negative was visible to me in any form or shape during the time of exposure in the camera. I work in the strongest manner for the fact that no one whatever had an opportunity of tampering with any plate anterior to its being placed in the dark slide or immediately preceding development."

"Now, all this time, I imagine, you are wondering how the stereoscopic camera was behaving itself as such. It is due to the psychic entities to say that whatever was produced on one half of the stereoscopic plates was produced on the other half, alike good or bad in definition."

On this page are photographs of three subjects which were used to demonstrate the new thought photography and illustrations of the various results such as, it is ascertained, may be obtained by it.

WHAT SURGERY CAN DO FOR PET CATS AND DOGS

Plead morning. Will you please strap on your new leg?

Artificial Limbs With Real Joints and Imitation Paws, Glass Eyes and Even False Teeth to Make Them Look as Good as Ever.

PET cats and dogs can now be patched up to look as good as new when through some accident of fate they have lost a leg, an eye, or, through age, their teeth. No longer does the faithful, but decrepit, old family watchdog have to be fed as carefully as the baby, for, thanks to the dentist, he is provided with a mouthful of shiny, white teeth just as serviceable as were those in which he took so much pride a dozen years ago.

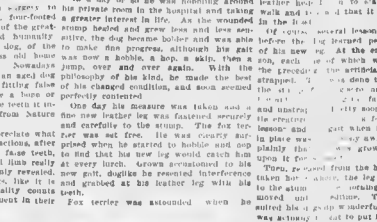

By the aid of anesthetic, antiseptic, and the skill of the X-ray, an eye, a leg, or even a tooth can be replaced by a new one, and the animal is made as good as new. The cat which had lost one leg was permitted to hobble around on three for ten miles of his days. The cat which was bereft of an eye through the agency of the small boy's airgun was prompted to pull it out of its eye.

THE PATENT COLLIE WEARING SPECIALLY MADE LEATHER SPLINTS

Wear Eye Made for Cats and Dogs.

A Cat Fitted with an Artificial Eye (the left one).

THE AUTOBIOGRAPHY of BUSTER BROWN

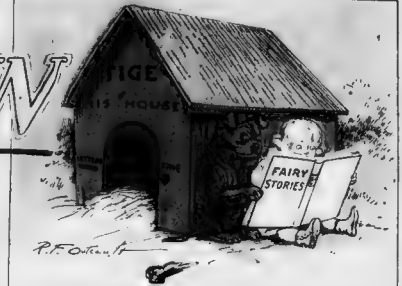

CHAPTER II.

by R.F. Outcault

NEVER knew how to talk to animals until I got acquainted with Tige. But he soon taught me the language of animals. In some respects it is better than the human language, for you see animals can make their wants known and can express their love or sorrow or dislike and disapproval. See how many people would be better off if they were dumb like animals, for then they couldn't be or gossip or bore their friends. If you have a dog for a friend, he is your friend because he loves you, and not for what there is in it. But few people love you because they are your friends, for they are not your friends,

they are too much interested in themselves to be anybody's friend. Dear old Tige—all that Summer when we first became acquainted he stuck to me like a brother. We spent most of our time together. If I was happy he sprang up and barked with joy. If I was sad he hung his head and tail and was as downcast as I was. Often when I sat gazing up into the beautiful blue sky or listening to the far-off note of some sweet wild song bird, Tige would look as meditative as a human being and do just as I did.

"WE SPENT MOST OF THE TIME TOGETHER."

If I felt like talking he would listen; if I felt like keeping silent he would remain as solemn as the Sphinx. Dogs are not traitors or flatterers. I am glad I have one for a friend. Tige used to awaken me every morning and as soon as I had my breakfast off we would go for the day. He used to show me where each bird had its nest, down in the meadow under the bushes or hidden in the tall grass. But bless his heart, he wouldn't have disturbed a bird's nest for the world. One day we went hunting for Wimpuses. I had never heard of a Wimpus, and I asked Tige what a Wimpus was. He said he didn't know, and nobody knew, because no one had ever seen one. "That's funny," I said; "where do they live?" "I don't know," replied Tige. He said he thought they lived in those holes in Swiss cheese, but no one had ever seen them come out, and people said that they only come out in the wash. But he told me, wherever you see a Calolycus nest you will always find some Wimpuses. "Ah, but where can we find the Calolycus nest?" I asked. "That's just it," said Tige, "nobody knows. I know," he went on, "where to find most every kind of a nest, but I can't find a Calolycus; no one has ever seen one!" So we gave up the search until another day. Tige always had funny names for things—he called a baseball ground a "run factory." "What's that?" I asked. "A run works," he said, "where they make runs." Can you beat that? He told me that what surprised him was that after they made the runs they never did anything with them. Poor Tige, he doesn't understand baseball. But he understands a good many more important things. He knows how to sympathize with a friend. He can cure a bump or a bruise for me by just licking it. That's more than you can do with a prize fighter. You can't cure him by licking him. I used to fall down stairs every day that Summer, and got quite expert at it.

(To be continued next Sunday.)

I FELL DOWN STAIRS EVERY DAY UNTIL I GOT TO BE AN EXPERT.

"EVERY MORNING TIGE WOULD AWAKEN ME"

SUNDAY AMERICAN JOURNAL EXAMINER PATTERNS

CHARMING designs for the new Spring costumes for women and girls are illustrated in this issue today. The simplicity and grace of the creations, which were modeled after the most stylish conceptions are of one striking and safety.

Four patterns from which any woman can make costumes are here. The first is a simple dress, the second is a more elaborate design, the third is a dress with a high collar, and the fourth is a dress with a low collar. Each pattern is illustrated with a drawing of the finished garment. The patterns are of the latest style and are suitable for all seasons. They are of the latest style and are suitable for all seasons. They are of the latest style and are suitable for all seasons.

Send this filled-in blank and ten cents in money or stamps for the most stylish pleated waist and five-gored skirt.

BOSTON AMERICAN, SUNDAY, MARCH 18, 1906

Worry and HURRY Kill Americans.

Copyright, 1906, by American News Association.

The Nervous Strain of False Living, High Pressure, Unnatural Speed Shortens Lives, Brings Premature Old Age, Waste of Human Energy.

THE twin curses of American life and civilization are incessant HURRY AND WORRY.

Energy and speed in their proper places mean power. But WASTED energy and USELESS hurry entail the greatest strain upon the vitality of an individual or a nation.

AMERICANS HURRY ALL THE TIME, WITH OR WITHOUT CAUSE. In a railroad station, at a steamboat or ferry landing IT IS ALWAYS HURRY.

In every great centre of business you may see the ablest men, who ought to be doing their best work at seventy, or even later, wearing themselves out in the forties.

In many restaurants the telephones are being arranged at tables that men may work and worry while he eats.

The business man well able to rest and live wisely can be found chewing his last mouthful as he looks over the ticker, driving the blood from his stomach to his brain and inevitably ruining his digestion.

You may count a thousand typical Americans arriving to take a train and EVERY ONE OF THEM IS RUSHING FRANTICALLY. Even the little children run wide-eyed, worried and anxious. The mothers and fathers clutch their bundles and rush.

The ticket sellers are overworked always at the last minute. Bad service, bad temper, tired nerves result.

Even in our pleasures, speed, useless hurry seems to be the great desired quality.

The American who gets a bicycle for health and amusement must go his hundred miles as fast as possible trying to beat the records of his friends.

The result is that his bicycle, instead of giving him better health, better lungs, blood well oxygenated, gives him round shoulders, tired nerves and muscles, lungs damaged. He has added simply a little to his supply of speed excitement, using his hours of recreation to add to the injury done by the hurried life of business.

The same is true of the rich man with his automobile. He must have his hundred horse-power machine, which makes no difference at all how early or how late he arrives. He must risk his life and often lose it in the mad American desire for speed at any cost.

Almost every American drives, hurries, worries, crowds himself carelessly and remorselessly.

The hurry does not come from necessity, but from foolish habits. Each American calculates to a minute just how long he requires to catch a train, AND TAKES ONLY AT THE LAST MOMENT. He will do so about uselessly until that last moment arrives. He then rushes downstairs, rushes to his car on the street, jumps off the car while it is moving, breathless and worn out, succeeds in catching the train.

If he had been a sane human being he could have caught it in a leisurely, sensible manner.

The American system of quick work has undoubtedly been an important factor in our national development. We have trained ourselves to work quickly, think quickly, move quickly. In our few years of active national existence we have achieved more, thanks to our high speed, than any other nation in the same length of time. BUT WE HAVE PAID A GREAT DEAL TO SUCCEED.

The price that we have paid we ought not to begrudge IF WE HAVE GOT FULL VALUE FOR IT. But what we want to warn you about now is the foolish USELESS hurry and USELESS worry and USELESS fretting.

The over-driven man must worry, the nerves of that man or animal MUST SUFFER.

Look at the American with the pale face, the consumptive's cough, the hollow chest.

Look at the thousands and tens of thousands of American business men, white-haired or bald before they are fifty. Look at the worn, fretful, anxious, ill-tempered—all due to the habit of hurrying uselessly.

The American habit of hurrying at meals alone has damaged greatly the entire nation. The health of the country, and though it is THE PROSPERITY OF THE COUNTRY, could be increased at least 50 per cent. by sensible eating WITHIN ONE YEAR.

The lives of citizens, particularly of the USEFUL citizens, who try to do something, could be increased 25 per cent. or more by sensible living; by cessation of hurry.

A great art, which you should study for your own protection and improvement, IS THE ART OF BEING DELIBERATE.

You know that if you take a horse and gallop him at full speed you will back him down in five miles or less, so that you cannot possibly send him any further that day; whereas, if you take him at a reasonable pace he may carry you fifty miles easily.

The same thing is true of your own brain, nervous system, digestion and general welfare. And it is true, not of the day only BUT OF YOUR WHOLE LIFE.

If you drive yourself just a little bit beyond the speed at which you can go comfortably, you may do more for a few hours. But you are preparing to make yourself a wreck at fifty or forty or sooner. AND AT THE END OF YOUR LIFE THE WORK THAT YOU WILL HAVE DONE WILL BE MUCH LESS THAN IT WOULD HAVE BEEN AT A MORE DELIBERATE PACE.

Try to get out of this hurry habit, for yourself. Try to give yourself time to walk erect, to be deliberate, breathe and eat properly.

Look around at the others hurrying and worrying. Go to your train ten or twenty minutes in advance quietly, and then spend the last few minutes looking at the poor foolish speed maniacs coming in behind you.

See the poor old women puffing away their nervous strength, the young men fretting and worrying, jerking their children along, making speed maniacs of them in their infancy.

Watch the whole population suddenly stampeding to its home, to its office, to its business, and ask yourself if that picture is not a very true cause of the early decay of the American's vitality.

Remember, young man, or young woman, that there is everything in knowing how to do a thing, WHEN AND HOW FAST TO DO IT.

We don't want you to have the slowness of the proverbial old Hollander. We wouldn't do away with that nervous force of youth which distinguishes the American from other nationalities.

But we should like to see those who read this newspaper use their vitality wisely, and GET RESULTS FROM IT. Make up your mind you are going to be so thoroughly master of yourself as to do the work WITHOUT WEARING OUT YOUR NERVES, EXHAUSTING YOURSELF, OR WORRYING YOURSELF.

How much better it is to plan ahead, know just how you are going to do and be ready like that great old Dane, Moltke, who led the German army to victory. When they told him that war was declared, he simply rolled over in bed, mentioned the particular drawer in his desk in which they would find their orders, and went to sleep again. He didn't jump up and tear his hair and rush about and wear himself out with excitement. HE HAD THINGS PLANNED OUT IN ADVANCE. He knew the value of his own vital force.

LIVE slowly, but not so slowly that you achieve things at your leisure. DON'T RUSH.

will be another week of good skating at Park Square Roller Rink (in evening the professional racer, Fred Chabers, will meet all comers).

THE WEATHER.

1,400 FLEET ESCAPE DEATH IN BURNING THEATRE

2 WOMEN IN FIRE MAY DIE.

Rescued Only After the Hotel
Marliaves' Names Seriously
Burn Them.

THREE OTHER PERSONS HAVE NARROW ESCAPES

Victims Cry Piteously for Aid
Before Firemen Could
Reach Them.

STREET CROWD LOOKS ON, HORROR-STRICKEN

Damage to the Famous Old
Hostelry Is Estimated at
About \$15,000.

Two women, screaming piteously for aid before they were found by the firemen, were seriously and perhaps fatally burned, and another woman and two men had narrow escapes as a fire which burned through the three upper floors of the historic Hotel Marliave on RoswORTH and Brimfield streets early this morning.

THE INJURED.

DEBURY, MARY, forty, Irish woman, overcome by smoke and seriously burned; Relief Hospital.

FRANCES, pantry girl, overcome by smoke and seriously burned; Relief Hospital.

HADRIAD, Ladderman truck 14, right hand and face cut by glass, Relief Hospital.

The rescue of the two injured women was most dramatic, coming in the nick of time after the horror-stricken crowd in the street below had been listening to the screams of the women helpless in their fourth floor chamber.

Sank to Floor Unconscious.

Mary Debury and Frances, the pantry girl, the latter employed in the hotel only three days—occupied the same room on the fourth floor. They had tried to get out of the fire escape, but were unable, and finally sank to the floor unconscious. The firemen, who were down their twenty minutes before they were rescued. The rapidly spreading flames had reached them by the time the firemen were down, and their injuries may be serious enough to end in death.

Adelaide Deloria, a kitchen woman sleeping on the fourth floor, fought her way to the balcony and was taken out by firemen. She was seriously burned.

Edward M. Steinhilber, a kitchen helper sleeping on the top floor, was under the bed when the fire started. He was taken out by firemen, but his injuries may be serious enough to end in death.

Smelled Smoke, Gave Alarm.
Louis Vanderhilt, another kitchen helper, was also going to bed. He smelled smoke, got out quickly and gave the alarm. He was one of the best known men in the hotel.

On Saturday night it was he who one of the first to get out of the hotel. He was taken out by firemen, but his injuries may be serious enough to end in death.

On Saturday night it was he who one of the first to get out of the hotel. He was taken out by firemen, but his injuries may be serious enough to end in death.

THOUSANDS JOIN IN EVACUATION, ST. PATRICK'S DAY FETE.

Double Celebration by Patriotic
Boston a Record Breaker
for Enthusiasm.

GREAT CITIZENS' AND
HIBERNIAN PARADES

Festivities of Day Include
Pageants, Banquets and
Flow of Oratory.

Floods of Irishmen and
strangers within the city gates took
joyful part yesterday in the splen-
did dual celebration of Evacuation
Day and St. Patrick's Day.

The double observance was one
of the best in the city's history.

There were two magnificent pa-
rades. The one in honor of the birth
of St. Patrick was the 7,000 line
of the Ancient Order of Hibernians,
whose route was mainly in the city
proper.

With stirring music, a mingling
of American and Celtic also, the
society sang and drummers of Irish
marched to repeated applause. They
were lined with the green of Erin
mingled with the American red, white
and blue. On every side, in every bot-
tom, was the living green of the
shamrock—the beloved shamrock that
is emblematic of the Emerald Isle.

The Evacuation Day parade on this
13th anniversary of the evacuation of
South Boston by the British troops
was, naturally, in South Boston, the scene
of this historic episode. In this parade
members of the South Boston Citizens' As-
sociation were led with military "back-
step" from the navy, and other civic and
military bodies. Their parade route was
along the waterfront, the red, white
and blue production, with the Celtic
green, offering bold relief where some
of the Boston residents combined them
in celebration of both holidays.

Review of the Parades.
At four o'clock the parade was reviewed
by Mayor John A. Barry and a num-
ber of the most distinguished citizens.

The review was one of the double tra-
ditions of the city. The review was
one of the double traditions of the city.

Schidlofski, Doomed to Death, Covers in Steel Cage as Jury Brings in Verdict of "Guilty"

"Face to face with the inevitable, the
soul of this brute-man was bared—a shrivel-
led, misshapen soul—and it was a
thing not good to see."

DEPUTY SHERIFF EVELL, SCHIDLOFSKI, COURT OFFICER WIGGIN,
SCHIDLOFSKI FAINTING AFTER VERDICT OF "GUILTY," GOING TO DEATH CELL.

THUG ATTACKS AND ROBS WOMAN AT SOUTH END.

Restless Eyes of Brutal Wife Slayer Searches Throng
of Faces in Vain for Sympathy.

John Schidlofski, a brute who murdered his wife with a hammer on the
Armatron golf links last Summer, heard a jury pronounce the verdict
of "guilty" in the first degree, and he was taken to the death cell.

"Guilty of murder in the first degree," was the verdict. It was the
expected one. The only wonder in the minds of officials and spectators was
that it took the takers nearly two hours to reach their decision.

It was 11:15 when the jury returned. The jury was composed of twelve
men, and they had heard the evidence for two days. The jury was
composed of twelve men, and they had heard the evidence for two days.

Remove Manacles in Steel Cage.

Deputy Sheriff Evelyn came in at 4:15 with Schidlofski, shackled wrist
to wrist. They entered the steel cage—the same one in which Charles L.
Tucker heard the same fearful words a year ago last January—and Schid-
lofski, the manacle removed, took off his coat and hat, tossed the long hair
on his head.

As he was crossing an alley, she was
suddenly seized from behind and by his
long black belt he took the man
prisoner by getting a look at his face
before he was taken to the cell.

FIRE LEAPS OUT FROM STAGE.

Flames That Destroy Woburn
Auditorium Stop Amateur
Performance.

MEN, WOMEN, CHILDREN—
RUSH INTO THE STREET

Four Faint and Are Trampled
Upon, but Are Not Serious-
ly Hurt.

LOSS PROBABLY WILL
MOUNT UP TO \$50,000

Presence of Mind of Director
and Employees Averts Panic
and Saves Lives

A fire which destroyed the Woburn
Auditorium and threatened other
property, last night, threatened the
lives of 1,400 people. But for the ad-
mirable presence of mind of some,
and quick, cool action of others, a
terrible tragedy might have occurred,
for the situation contained all the ele-
ments needed to make, under less
favorable circumstances, a second
Iroquois holocaust.

That but a woman suffered injury out
of 1,400 people seems little less than
miraculous. For the fire broke out during
a performance of the dramatic opera
"The Girl of the Golden West" when
the audience was at its height. The
auditorium was crowded to the doors,
and the fire broke out in the rear of
the stage. The fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the
rear of the stage, and the fire broke
out in the rear of the stage.

The fire broke out in the rear of the
stage, and the fire broke out in the

out in the rear of the stage.

MUNICIPAL OWNERSHIP IS MAKING GIGANTIC STRIDES. SAY'S BEMIS. NOTED EXPERT

COMING AND COMING FAST, HE DECLARES

Professor Edward W. Bemis of Cleveland is the famous expert in gas and electric lighting.

D. R. ELECTS MRS. A. F. FITZ REGENT

Former Head of State Revolution Daughters Returned to Office.

The State Society Daughters of the American Revolution, held its annual convention at the Hotel Marlborough, Boston, on Saturday, March 17. The convention was held for the purpose of electing officers for the coming year. Mrs. A. F. Fitz was elected regent, and Mrs. D. R. was elected president. The convention was a success and the officers were elected with much enthusiasm.

GROVER FISHES ON 69TH BIRTHDAY

Former President Cleveland, Free from Business Care, in Everglades. New York, March 17.—Former President Cleveland, who was in Florida about a week ago, is now in the Everglades. He is enjoying the scenery and the climate. He is free from business care and is spending his time in a most enjoyable manner.

THE VALUE OF CHARCOAL.

How Useful It is in Preserving Health and Beauty. Nearly everyone knows that charcoal is the safest and most efficient deodorant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose. Charcoal is a remedy that is more than a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system. Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables. It proves the complexion, it whitens the teeth and further acts as a natural and entirely safe cathartic. It absorbs the injurious gases which collect in the stomach and bowels, it disinfects the mouth and throat from the poison of catarrh. All drugs used in one form or another, but probably the best charcoal and the most for its use is in Stuart's Charcoal Lozenges; they are composed of the finest powdered willow charcoal, and other harmless ingredients in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey. The daily use of these lozenges will soon lead to a much improved condition of the general health, better complexion, sweeter breath and purer blood, and to clear the complexion and to clear the complexion, to continue use, but, on the contrary, great benefit.

shorter matter, who in general, even in the case of the former, is not a public enemy, and that the only way to get rid of the trouble is to get rid of the cause. The only way to get rid of the cause is to get rid of the cause. The only way to get rid of the cause is to get rid of the cause.

"Changes in Law Must Come." Massachusetts was one of the first States to provide for the municipal ownership of public utilities. The law was passed in 1889, and it has since been amended several times. The law is now in force, and it is being enforced.

Advocates the Referendum. There should also be a change in the manner of electing the judges of the Supreme Court. The judges should be elected by the people, and not by the legislature. This is the only way to get rid of the trouble.

BOSTON SPEAKERS TO TALK IMMIGRATION

Portland, Me., March 17.—Four prominent speakers from Boston will deliver addresses on the subject of immigration in Portland, Maine, on Monday, March 19. The speakers are Mr. J. W. Aldrich, Mr. J. W. Aldrich, Mr. J. W. Aldrich, and Mr. J. W. Aldrich. They will speak at the Portland Convention Hall.

DIES FROM POISON IN COLORED CANDY

Montpelier, Vt., March 17.—An autopsy was held today on the body of a young woman who died from poisoning by eating colored candy. The candy was found to contain a large amount of arsenic. The woman was found dead in her room, and the candy was found on the table next to her bed.

Harvard Shooters Badly Beaten at B. A. A. Traps

The worst defeat a Harvard team has ever experienced at the B. A. A. traps is the one which was scored up by the Harvard team yesterday in the first round of the two rounds this season. The score was 211 to 111.

A bright sun on a field of white snow was a large factor in the defeat of the Harvard team, who apparently were unable to get used to the glare of light that surrounded them. The snow men on the traps were not of practice and were in the shadows.

Maxwell, the captain, Adams and Howland were the only ones who were successful in shooting a few birds.

The score was 211 to 111. The Harvard team was badly beaten at the traps.

JOHANN MOST, LEADING ANARCHIST IN AMERICA, DEAD

Stormy Career in Europe and United States; Arrested When McKinley Was Assassinated.

Utterances of Johann Most Day After McKinley Was Shot

Despots are outlaws—spare them is a crime. As they make use of treachery, poison and murder, so all these things should be employed against them. It is the duty of everyone who has the opportunity to carry it out.

Whatever stands on the other side of the line which divides the camp of the ruling possessors of power from that of the people has come under the ban. Let the people carry out the sentence.

We say, "Murder the murderers! Save humanity by blood and steel, poison and dynamite!"

—Extracts from *Freiheit*, published on day after McKinley was assassinated.

Cincinnati, March 17.—Here Johann Most, anarchist, socialist, journalist, play writer and actor in his own plays, is dead at his home here, of apoplexy. He was sixty years old and leaves a widow and two daughters.

Mr. Most arrived prominently as an anarchist in several countries of Europe and finally came to America in 1882, where he followed by him and his associates were unhesitatingly arrested. He published a paper called the *Freiheit*, and his literary utterances influenced American readers throughout the country.

Almost from the time he entered this country he was harassed by the police. His was arrested several times, paid a number of fines and served several terms in jail.

When President McKinley was assassinated, September 6, 1901, Mr. Most came before the public as the man who had indirectly caused McKinley's death by the treachery in his paper. He was arrested on the following day because of an article urging the murder of political leaders, kings and rulers the world over. This

TEEL TRUST FIGHTS ALONE, TWO LITTLE ENGLISH GIRLS CROSS OCEAN TO FIND HOME HERE

Verdict of \$10,500
Aunts Escape from Award to Employes in Fatal Explosion at Worcester Works.

Worcester, March 17.—The explosion of the American Steel and Wire Co. is now to be carried to the full bench of a Supreme Court on exceptions filed for the trust, which is the decision in the case. The three cases were called at the December sitting of the Superior Court, and verdicts for the plaintiffs aggregating \$10,500 were rendered.

The amounts returned by the Supreme Court are: For Annie Johnson, administratrix, \$2,500; Edward G. Matthews, \$2,500; C. J. Erdman, \$5,500.

The three cases are the outcome of an explosion of steam pipes at the Grove street works of the mills last Fall. Charles Johnson died from injuries received, and the other two men were seriously injured.

STRIKE THREATENS CENTRAL VERMONT; TIE-UP FEARED.

Trainmen Demand More Pay and Say 1,500 Employes Will Quit if Request Is Denied by the Management

Burlington, Vt., March 17.—Unless the Central Vermont Railroad meets the demands of the 1,500 trainmen, engineers, conductors and firemen for an increase of wages there will be a general strike which will tie up the road from New London, Vt., to Montreal, according to the employees. The issue will be thoroughly discussed early next week, when there will be a conference at St. Albans between General Manager Jones and Superintendent of Transportation Mullin, representing the railroad, and a committee representing the trainmen.

Two reasons are given by the men for their demands. One of these is because the wages of their men, and the other because the probability of the operation of the Government railroad rate bill, which they believe will affect their material.

Officials of the Central Vermont road have stated that they are willing to meet them half way, but also have expressed the wages of their men, and the other because the probability of the operation of the Government railroad rate bill, which they believe will affect their material.

Officials of the Central Vermont road have stated that they are willing to meet them half way, but also have expressed the wages of their men, and the other because the probability of the operation of the Government railroad rate bill, which they believe will affect their material.

Here Is a Life Income for You Without Speculation

This Stock Has Doubled in Value Since Sept. 1st, 1905. It Will Soon Double Again.

I Have Made Millions of Dollars for Thousands of People by My Patents.
I Expect to Make Millions More. Come in With Me if You Want to Share in These Enormous Profits.

Hetty Green, the Richest Woman in the World, Says: "The Way to Get Rich Is to Invest in Necessities."

The Bidwell Cold Motor is one of the greatest necessities of the 20th Century. This stock has already taken four jumps up. Now is the time to buy. It will go higher in about thirty days. The profit is yours. Don't speculate—invest. Here you have a necessity. Look at this list below. Every one of these people made his fortune by supplying some great necessity.

Here is the way manufacturing stocks in necessities jump:

	First bid at	Now sell at
The Electric Trust.....	150	187
Quaker Oats, common.....	45c	145
American Radiator, common.....	33c	100
American Smelting.....	30c	195

And this is only a few. Safer and surer than life insurance or trust stocks. All this advance has been made in ten years and less.

I will supply the greatest necessity now known in the business world. The demand is so large that it will make all of us rich. If you want to get in with me on this you will have to be quick about it. The stock is selling like hot cakes.

Dear Friend—

Inventor of the Trolley Car System, Inventor of the Railway Car Telephone System, Inventor of the Bidwell Cold Motor, Inventor of the Water Electric Generator.

From New York to San Francisco warm up and without a hitch.

Besides running faster they would be more safe and sure than steam, cost less to operate, and would last longer than any other now known.

The Bidwell Cold Motor is the greatest invention out since I invented the trolley car.

The Opportunity of a Lifetime.

I want to give you and woman a chance to come in with me on this, for I expect to make millions for the stockholders out of this new patent.

The stock will be sold on the square. There will be no horrid poems about preferred or common stock, for any other scheme, trick or swindle by which anybody can be fooled out.

Every dollar invested will represent one hundred cents of the best stock. Every share will be exactly the same as every other share. It is a more perfect system in operation than any other telephone you ever saw. This is on the road toward millions for the stockholders.

I have a lifelong reputation for square dealing. I will personally see to it that every stockholder gets a square deal on this.

In order to make it possible for every man and woman to get in with me on this big deal I have decided to sell the stock for a short time only at the following prices:

100 shares, \$200; 250 shares, \$125; 500 shares, \$250; 1,000 shares, \$500; 3,000 shares, \$2,500; not over \$50,000 shares at this price for 30 days.

100 shares, \$50 cash, nine monthly payments of \$5 each; 250 shares, \$125 cash, nine monthly payments of \$12.50 each; 500 shares, \$250 cash, nine monthly payments of \$25 each; 1,000 shares, \$500 cash, nine monthly payments of \$50 each; 3,000 shares, \$2,500 cash, nine monthly payments of \$250 each.

Send all money by bank draft, express money orders, P. O. order or registered letter.

Special to Electric Light Men and Manufacturers.

We are now prepared to fill your orders in our own factory. We are now manufacturing the Bidwell Cold Motor. We are selling them at cost and are cash customers for art and household lights on a guarantee not to burn out for 10 years.

I never made an unsuccessful invention. My first invention was the electric fan just as it is run all over this country in hot weather. I didn't get a patent on it, but see what a tremendous success it is!

I made it perfect and successful right from the start. It has never been improved since I invented it. Look at the millions of money it has made for the stockholders. The stock in the trolley manufacturing companies sold below 15 cents a share in 1893 and 1894. Poor men could buy that stock then. Thousands of them did buy it and every one who held on to it is a rich man to-day.

No Man on Earth Ever Lost a Penny He Invested With Me.

If so I will make it good. Next I invented the Railway Car Telephone System. It is a system by which passengers or train crews can telephone from still or moving cars anywhere the same as if seated in an office. It is a more perfect system in operation than any other telephone you ever saw. This is on the road toward millions for the stockholders.

This Is My Greatest Invention.

Now I have invented something bigger and greater than either of the above. It is called the Bidwell Cold Motor. It is guaranteed not to burn out and is exactly the kind of a motor the steam railroad people have been looking for. It will change all the steam railroad systems over to electric runs, because it will be cheaper to run than steam and can be run faster and more safely than any present method.

The one drawback the railroads have had in changing over to electricity has been that no motor as at present made can be run 150 miles at 60 miles an hour without burning out. It would melt the wire.

By using the Bidwell Cold Motor a train of cars could be run without a stop at the rate of 60 or 80 miles an hour and not even warm up and without a hitch.

Besides running faster they would be more safe and sure than steam, cost less to operate, and would last longer than any other now known.

The greatest invention out since I invented the trolley car.
